

1. Sweet tastants stimulate adenylate cyclase coupled to GTP-binding protein in rat tongue membranes B.J. Striem, U Pace, U Zehavi, M Naim, D Lancet - Biochem J, 1989.
2. Generation of cyclic AMP in taste buds of the rat circumvallate papilla in response to sucrose B.J. Striem, M Naim, B Lindemann - Cell Physiol Biochem, 1991.
3. Adenylate cyclase responses to sucrose stimulation in membranes of pig circumvallate taste papillae. M Naim, T Ronen, B.J. Striem, M Levinson, U Zehavi - Comp Biochem Physiol B, 1991.
4. Potential of ferulic acid as a precursor to off-flavors in stored orange juice. M Naim, B.J. Striem, J Kanner, H Peleg - Journal of Food Science, 1988 .
5. The sweet taste inhibitor methyl 4, 6-dichloro-4, 6-dideoxy- α -D-galactopyranoside inhibits. BJ Striem, T Yamamoto, M Naim, D Lancer, Chemical Senses, 1990.
6. Is adenylate cyclase involved in sweet taste transduction B.J. Striem, U Pace, U Zehavi, M Naim, D Lancet - Chem. Senses, 1986.
7. Saccharin induces changes in adenylate cyclase activity in liver and muscle membranes in rats. BJ Striem, M Naim, U Zehavi, T Ronen - Life Sci, 1990.
8. Chapter in a book:
Cellular signal transduction of sweetener-induced taste.
M Naim, B.J. Striem, M Tal - Adv Food Nutr Res, 1998 .
